

HARMONY

MASSAGES CHAIR - RELAXATION FOR BODY, MIND AND SENSES

< relaxmyway

WHEN MASSAGE BECOMES A RITUAL

The first moment of deep relaxation begins here, with intelligent massage technology, exceptional comfort and mental calm working together in perfect harmony.

With Harmony, relaxation does not begin only when you close your eyes, but from the very moment you sit down. Its elegant design with subtle lighting blends harmoniously into modern living spaces and makes it far more than a massage chair: Harmony is your personal retreat - a place where body, mind and senses can come back into balance.

Thanks to intelligent body detection, Harmony precisely tailors the massage to your individual body shape. Two massage robots create a particularly comprehensive and finely tuned massage experience. A special innovation is the softly shaped silicone massage heads: the larger upper massage heads, with their wave-shaped texture, gently follow the contours of the body and provide a pleasantly flowing, broad-area massage sensation. The smaller lower massage heads complement every movement with finer, targeted impulses. Combined with innovative 4D massage technology, they create a vivid, intensive yet harmoniously balanced massage - inspired by professional massage techniques and designed for moments when you simply want to let go.

Whether after a long day at work, during a quiet evening or as a conscious break in between, Harmony is there exactly when you want to unwind. A wide range of automatic programmes, individually adjustable functions, soothing heat, two Zero Gravity positions and carefully considered comfort details create a holistic wellness experience for your home.

Subtle aromatherapy, an integrated audio system, voice control, a USB port and wireless charging round off your personal time out in comfort.

What makes Harmony special is not only what it can do, but above all how it makes you feel:
at ease, relieved and completely centred.

Aromatherapy

Massage. Heat. Sound. Scent. Design.
A feel-good experience for body, mind and senses.

THE PERFECT INTERPLAY

Body. Mind. Senses. Perfectly in harmony.

It is the interplay that makes Harmony so special: while the massage loosens your muscles and provides pleasant relief, the fragrances gently unfold their effect on your senses. At the same time, braintronics® guides your mind into a state of soothing calm. The result is a holistic experience that touches not only the body, but the whole person.

A) AROMATHERAPY – RELAXATION YOU CAN BREATHE IN

Immerse yourself in your own personal world of well-being. The integrated aroma function accompanies your massage with selected fragrances and turns every session into a sensory experience. Six harmoniously coordinated fragrance worlds create an atmosphere to suit your mood, from gently calming to fresh and invigorating.

- ✓ your personal oasis of calm
- ✓ a sensory complement to the massage experience
- ✓ fragrance worlds for your personal time out

B) BRAINTRONICS® – WHEN RELAXATION BEGINS IN THE MIND

Consciously switch off, both physically and mentally. Proven braintronics® technology combines soothing massage with guided programmes and gentle sounds. This can create an intense moment of relaxation that helps you leave everyday life behind and become more consciously aware of inner calm.

- ✓ a conscious break from everyday life
- ✓ greater depth in the relaxation experience
- ✓ an easy way to begin relaxing

medium intensity, very
fresh

Grass
particularly light,
subtle fragrance

Freesia
medium to strong,
pleasantly floral

Bamboo
medium intensity,
balanced and clear

Mint
medium to strong,
fresh minty note

Agarwood
light intensity,
pleasantly subtle

INNOVATION MEETS COMFORT

Sophisticated massage and comfort technology

www.casada.de

Harmony combines innovative massage technologies, carefully designed comfort functions and modern features to create an exceptional feel-good experience. Discover the wide range of functions that make your personal time out even more pleasant and individual. The following overview presents the many functions of this massage chair at a glance.

Detailed information and further explanations of the individual functions can be found at: <https://www.casada.de/aktuelles/casada-glossar>

BRAINTRONICS®

braintronics® technology uses audio stimulation to synchronise your brainwaves. In combination with a specially developed massage programme, it relaxes your stress-strained body.

2D MASSAGE

The 2D massage moves the massage heads evenly in height and width, creating a pleasantly flowing and balanced massage sensation.

3D MASSAGE

In addition to moving vertically and horizontally, the massage heads also move forwards and backwards. This allows the massage depth to be adjusted even more individually and noticeably.

4D MASSAGE

Innovative 4D massage combines three-dimensional movements with changing speeds and rhythms for a particularly vivid, flowing and natural massage sensation.

2 MASSAGE ROBOTS

Two independently operating massage robots can work on different areas of the body at the same time, providing particularly versatile and harmoniously coordinated massage movements.

SHIATSU

Inspired by traditional Japanese finger-pressure massage, the Shiatsu function uses precise, rhythmic pressure movements to create a particularly harmonious and natural massage sensation.

KNEADING

The kneading massage is inspired by the classic techniques of a hand massage. Rhythmic kneading movements create a pleasantly intensive and particularly natural massage sensation.

TAPPING

The tapping massage is based on the rhythmic tapping movements of a classic massage, adding a dynamic and varied dimension to the massage experience.

ROLLING

The rolling massage moves evenly along the body and uses flowing massage movements to create a particularly harmonious and pleasantly relaxing massage experience.

KNEADING & TAPPING (DUAL ACTION)

The kneading massage is inspired by the classic techniques of a hand massage. Rhythmic kneading movements create a pleasantly intensive and particularly natural massage sensation.

CALF KNEADING MASSAGE

Specially coordinated massage elements perform rhythmic kneading movements in the calf area, creating a pleasantly intensive yet comfortable massage sensation.

FOOT ROLLERS

The integrated foot rollers move evenly beneath the soles of the feet, providing a pleasant and varied foot-massage sensation.

SPOT

The massage heads can be directed towards a selected area, enabling a concentrated and particularly precise massage there.

AIRBAG MASSAGE & ZONES

Inflating and deflating airbags apply even pressure to selected areas of the body. Depending on the model, the desired massage zones can be selected individually for a pleasantly enveloping massage sensation.

AIRBAG INTENSITY

The intensity of the airbag massage can be adjusted individually to suit your personal massage preference.

DUAL-SENSOR BODY SCAN

Two sensors detect key body contours and shoulder height with particular precision. Depending on the model, the detected settings can then be corrected individually.

ADJUSTABLE SHOULDER AREA

The position of the massage heads in the shoulder area can be adjusted upwards or downwards, allowing precise adaptation to the user's height.

WAIST STRETCH

Coordinated movements in the waist and back area add a pleasantly stretching and opening sensation to the massage.

I-OPEN FLEXIBLE RAIL

The flexible, ergonomically shaped massage rail follows the contours of the back and buttocks, enabling a particularly extensive massage range.

RECLINING & ZERO GRAVITY POSITION

The adjustable backrest and footrest bring the body into a comfortable reclining position and create a pleasantly relieving, almost weightless sensation.

ADJUSTABLE FOOTREST

The footrest can be extended or, depending on the model, automatically adapts to the length of the legs, supporting a comfortable reclining position.

SHOULDER GRIP MASSAGE

The massage robot pampers the shoulder area with a specially coordinated shoulder-grip massage. Speed and intensity can be adjusted to suit your personal preference.

CARBON HEAT

Carbon heat complements the massage with pleasantly even warmth, providing additional comfort during use.

CARBON LEG HEAT

Carbon heat in the leg area complements the massage with evenly distributed warmth, providing additional comfort for the legs and calves.

ADJUSTABLE HEAT

Depending on the model, the heat function can be adjusted individually to suit your personal comfort preferences.

FRAGRANCE & AROMA FUNCTION

The integrated aroma function complements the massage with selected fragrances and creates an individually customisable feel-good atmosphere, from pleasantly calming to fresh and invigorating.

VOICE CONTROL

Selected functions can be conveniently controlled by voice command, allowing important settings to be made with ease.

AI MUSIC

The AI Music function complements the massage with coordinated soundscapes and supports a relaxed atmosphere during use.

BLUETOOTH

Connect your smartphone or tablet wirelessly and accompany your massage with music, audiobooks or relaxing sounds.

MUSIC

The integrated audio system accompanies the massage with music or relaxing sounds and creates an individually customisable feel-good atmosphere.

VOLUME

The volume of the integrated audio system can be conveniently adjusted to suit your personal listening preferences.

USB CHARGER

Compatible mobile devices can be conveniently powered via the integrated USB port during the massage.

WIRELESS CHARGING

Compatible smartphones can be charged wirelessly on the integrated charging surface during the massage.

FLAT LCD TOUCHSCREEN REMOTE CONTROL

The flat LCD touchscreen remote control provides convenient, clearly arranged control of all the important massage and comfort functions.

QUICK START

The Quick Start controls in the armrest provide particularly simple, direct access to key settings.

MEMORY FUNCTION

The intelligent memory function remembers your preferred massage settings and makes it especially convenient to start your personal favourite massage.

SPEED

The speed of the massage movements can be adjusted individually to suit your personal massage preference.

WIDTH

The distance between the two massage heads can be adjusted to narrow, medium or wide.

AUTOMATIC PROGRAMMES

Various automatic programmes combine selected massage techniques, intensities and comfort functions into harmoniously coordinated massage sequences.

CASADA WAVETOUCH MASSAGE HEADS

Soft silicone massage heads with a special wave structure adapt pleasantly to the contours of the body. Their even pressure distribution creates a natural massage sensation without uncomfortable pressure points.

HAND-MASSAGE SENSATION

The specially developed massage heads imitate the movements of a massage therapist's hands. They can extend by up to 6.5 cm at a maximum extension angle of 41 degrees and can effectively massage the neck, thoracic and lumbar areas like a hand.

REFLEX ZONES

Foot reflexology massage regenerates the foot muscles and has a harmonising effect on almost all organs in the body.

SPACE-SAVING

For reclining positions, the massage chair moves forwards and therefore requires very little clearance from the wall. Space-saving and comfortable!
